

All cookies are **first-party** (set by your domain) unless noted. Third-party cookies may be set during redirects to external services like Stripe checkout (on checkout.stripe.com), but they are not set on your domain.

1. Session Cookie

- **Name:** oposchat_session
 - Derived from [config/session.php](#): Str::slug(env('APP_NAME', 'laravel'), '_').'_session'
 - APP_NAME="OposChat" (from [.env](#)), slugged to oposchat.
- **Function:** Stores the user's session ID for authentication, state management, and SPA features (via Sanctum stateful guards). Essential for login persistence and CSRF protection.
- **Duration:** 120 minutes (2 hours) from last activity (configurable via SESSION_LIFETIME=120 in [.env](#)).
- **Type:** First-party, HttpOnly, Secure (in production HTTPS), SameSite=Lax.
- **Category:** Strictly necessary (required for site functionality).

2. CSRF Token Cookie

- **Name:** XSRF-TOKEN
 - Fixed name set by Laravel's EncryptCookies and VerifyCsrfToken middleware (used by Inertia.js for X-XSRF-TOKEN header).
- **Function:** Protects against Cross-Site Request Forgery (CSRF) attacks by validating form/API requests. Decrypted server-side.
- **Duration:** 120 minutes (matches session lifetime).
- **Type:** First-party, Encrypted, Secure (production), SameSite=Lax.
- **Category:** Strictly necessary.

Potential Additional Cookies

- **Remember Me Cookie** (if user selects "Remember me" on login):
 - **Name:** oposchat_remember_web_[40-character-hash] (e.g., oposchat_remember_web_abc123... – exact hash is app-specific, generated from APP_KEY).
 - **Function:** Long-term authentication (persists login across browser sessions).
 - **Duration:** 5 years (default Laravel behavior).

- **Type:** First-party, HttpOnly, Secure, SameSite=Lax.
- **Category:** Strictly necessary (optional feature).
- Note: Only set if explicitly chosen; not automatic.

Third-Party Cookies

- **None embedded on your domain.**
 - Stripe integration uses **hosted checkout** (redirect to checkout.stripe.com), where Stripe sets its own third-party cookies (e.g., __stripe_mid, __stripe_sid for fraud prevention).
 - **Function:** Payment processing, fraud detection.
 - **Duration:** 1 year.
 - **Domain:** .stripe.com (third-party).
 - **Category:** Strictly necessary for payments.
 - Mention in policy: "During subscription checkout, Stripe (payment processor) sets cookies on checkout.stripe.com."
- No other third-parties (no GA4, Hotjar, etc.).

Compliance Notes (GDPR + LSSI Spain)

- **Necessary cookies only:** No marketing/analytics cookies. Banner/consent not required for these (Art. 22 LSSI exempts strictly necessary).
- **Update policy:** List these exact names, purposes, durations, and types. Include expiry calculation (session-based).
- **Config sources:**

| Cookie | Config Location |
|------------------|---|
| oposchat_session | config/session.php + .env |
| XSRF-TOKEN | Laravel default (EncryptCookies middleware) |
